## PROFESSIONAL SUMMARY

As a Junior Web Developer at Bluehance360 LLP, I have developed several full-stack websites using the Wix platform with Velo coding as well as custom coding. Recently started working on WordPress.org, and planning to learn other platforms as well such as WordPress.com Shopify, Webflow, etc. My passion for web development began in my teenage years when I started learning HTML and has continued to grow through college and my work at Mitr Learning & Media Pvt. Ltd. I am resourceful, always seeking new ways to write code and improve its robustness, performance, and scalability. I have experience teaching others and enjoy helping my team members. My ability to break down code for easier debugging and modification makes me a valuable asset to any development team.

**Custom Web and Android App**

In my free time, I enjoy working on my pet project, "DotBox," a digital version of the traditional paper-and-pencil game "Dots and Boxes." This project is built using pure JavaScript, HTML, and CSS, and utilizes SVG for most of the graphics and animations. More information about this project can be found on my GitHub repository at [<https://github.com/vishesh-learn/dotbox-web>]. Through this project, I have been able to further develop my skills in web development and continue to learn and grow as a developer.
